EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Rewrite claim 115 thus:

115. (Amended) The method of claim 114, wherein the detergent enzyme is an amylase, a cellulase, a ~~lipasean~~, lipase, an oxidase, or a protease.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Elias J. Lambiris on 18 March 2005.

The following is an examiner's statement of reasons for allowance:

Applicant's cancellations of claims 97-112 and presentation of new claims 113-120 in the Response filed 23 December 2004 avoid the rejections of record herein under the first and second paragraphs of 35 U.S.C. § 112. The examiner's amendment above corrects typographical errors in claim 115. Applicant's arguments filed 23 December 2004 are persuasive in overcoming the rejections of record herein over the prior art of record because, as Applicant notes, Ladner et al. do not map any epitope of an integral polypeptide, such as an enzyme, but determine only the capacity of peptides found in the primary structure of streptokinase, but removed from its tertiary structure, to bind to an antibody when presented as part of a bacteriophage surface protein in a "phage display" system. Teachings of the instant specification appreciate the fact that epitopes that evoke an immunogenic response in an animal can be formed by secondary and tertiary structures of a folded, native, integral polypeptide as well as by linear, primary, structures such as the peptides surveyed by Ladner et al. The new claims 113-120 herein are not suggested by the teachings of the prior art where the claimed methods require the use of antisera raised to both a native or reference enzyme and to variants

Art Unit: 1652

of that enzyme in the identification epitopes in order to select an enzyme variant having a reduced immunogenicity relative to the native or reference enzyme.

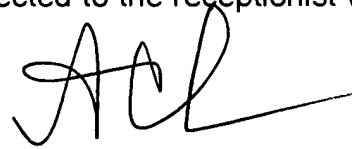

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
